Chief, FBI

Electrification Affecting FBIS Reseda

1. It is requested that this office be advised of any steps taken locally to electrify the transportation system in the vicinity of the FBIS monitoring station, when such electrification would result in subsequent interference to the monitoring operation.

2. The newspaper story advocating electrification of the Southern Pacific rails has been submitted to the appropriate authorities within the agency. It is felt by the General Counsel that there is no need to intervene in this matter now, but they recommend that we follow the case closely, in order that action may be initiated should the actual threat to successful monitoring become serious.

3. The Contacts Branch has also been asked to assist in obtaining advance notice of possible electrification of the Southern Railroad and will also endeavor to keep the agency advised with respect to this matter.
